EDUCATION

Monroe University | Bronx, NY | GPA: 3.9/4.0 **Expected Dec. 2026**

B.S. Computer Information Systems | Minor in Mathematics

- **Courses:** Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Web Application Development, Systems Analysis & Design, Advanced Programming, Statistics & Probability, Calculus I and II

WORK EXPERIENCE

Girls Who Code - Summer Program **Jul. 2024 - Aug. 2024**

Tech Volunteer & Python Instructor Brooklyn, NY (Remote)

- Led hands-on Python sessions covering functions, control flow, data structures, algorithms, and problem decomposition.
- Improved student debugging and computational-thinking skills by mentoring participants through interactive programming projects.

Digital Future Initiative **Mar. 2020 - Aug. 2020**

Volunteer Tech Educator Tbilisi, Georgia

- Expanded access to technical education for 20+ underserved middle-school students by teaching computer literacy, online safety, and Python fundamentals.
- Delivered weekly workshops by designing beginner-friendly lessons and collaborating with volunteers to track student progress.

LEADERSHIP AND AWARDS

Monroe University Honors Program and President's List **2025 - 2026**

- Earned President's List recognition for four semesters while maintaining a 3.9/4.0 GPA.
- Completed honors-level academic work connecting technical research, quantitative analysis, and applied problem-solving.

TECHNICAL PROJECTS

TaskFlow API (Python, FastAPI, PostgreSQL, SQLAlchemy, Docker, pytest) **Aug. 2026**

- Developed a RESTful task-management API with layered architecture for users, projects, and tasks.
- Implemented PostgreSQL relationships, Alembic migrations, filtering, sorting, pagination, partial updates, and consistent error handling.
- Containerized the application with Docker Compose and added automated tests, structured logging, and a metrics endpoint.

Secure Wireless Network Architecture (Wi-Fi 6E, WPA3, VLANs, IDS/IPS) **Apr. 2026**

- Designed a standards-based campus network supporting 9,200 users and 27,600 devices.
- Modeled 72 Gbps peak demand and specified OFDMA, MU-MIMO, 802.1X, VLAN segmentation, and wireless IDS/IPS.

Student Grade Management System (C#, Windows Forms, OOP) **Dec. 2025**

- Developed a desktop application for roster management, grade entry, and performance reporting using OOP principles.
- Connected event-driven forms to validated backend logic through a centralized in-memory repository.

TECHNICAL SKILLS AND CERTIFICATIONS

- **Languages:** Python, SQL, C#, JavaScript, HTML/CS, TypeScript
- **Tools:** FastAPI, PostgreSQL, SQLAlchemy, Git, Docker, AWS, Pandas, NumPy, Matplotlib, Tableau, React
- **Certifications:** Oracle Database SQL Certified Associate, PCAP - Certified Associate Python Programmer
